

Welcome to The Australian Television Content Variety Hour

With your host, The ghost of Skippy the Bush Kangaroo!

On today's show we'll be talking to Senator Stephen Conroy the Minister for Broadband, Communications and the Digital Economy

Over the coming weeks we will repeat this interview 11 times and each screening will count toward our Aussie content requirement. Hooray!

What are you watching?

The ghost of Skippy interviewing Stephen Conroy.

Answer the question Minister!

Minister why did you propose these sweeping regressive changes to legislation without cabinet approval?

I don't have to answer questions from a celebrity kangaroo! Certainly not a dead one!

If you want to see Australian stories why are our screens full of Kardashians and Housewives? Why do your changes mean we will see even less Australian drama, docos and kids TV?

If content requirements can be met with repeats and existing programming, how will these changes benefit the television production industry?

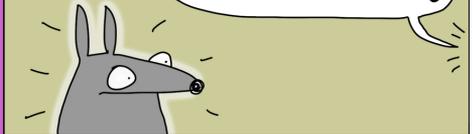

This is hilarious

Go Skip!

[inaudible]

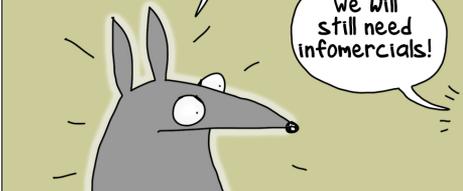

Someone has to press 'play'. A lot of shows are better on the 2nd, 3rd or even 15th viewing

Is this all just to make the commercial networks happy in an election year? The networks will get more broadcast hours, but won't need to make any more Aussie content.

Anyway, I thought this was supposed to be a cooking show. Where is Matt Preston?

We will still need infomercials!

Australians make some of the best and worst Television in the world! Why should we import other people's dreadful television? If that's what we want we can make our own!

Dear _____

As a member of your electorate, I appeal to you to:

- Oppose Senator Conroy's proposed reforms to the commercial television broadcasters license conditions;
- Urge the Government for meaningful implementation of Recommendation 18 of its own independent Convergence Review; and
- Protect our access to quality Australian stories.
